Akshit Joshi

akshitjoshi101@gmail.com | github.com/akshitjoshi101

PROFESSIONAL SUMMARY

M.Sc. Data Science student with hands-on experience in Python, SQL, machine learning, and NLP, gained through applied academic and independent projects. Skilled in building data-driven applications, predictive models, and analytics dashboards, with a strong foundation in statistical analysis and data preprocessing. Consistently high academic performer (CGPA: 9.58) seeking to apply analytical and problem-solving skills in a Data Analyst, Data Science or Data Engineer role.

TECHNICAL SKILLS

Languages: Python, R, SQL
Data Analysis: Pandas, Excel, Scikit-learn, NumPy, Statistical Analysis
NLP: TF-IDF, Tokenization, Lemmatization, Cosine Similarity
Machine Learning: Logistic Regression, SVM, KNN, Decision Tree, Random Forest, Deep Learning
Visualization & BI: Power BI, Dashboard Development
Databases & Backend: SQLServer, FastAPI, PostgreSQL

PROJECTS

Fake News Detection & Evidence Retrieval System | *Group Project* [2026]
Technologies: Python, Pandas, NumPy, Scikit-learn (TF-IDF), BM25, Flask, BeautifulSoup, HTML, CSS

- Built a fake news detection pipeline using TF-IDF features and a Linear SVM classifier (selected over Naive Bayes and Logistic Regression via validation macro-F1), achieving 96% accuracy and 0.96 macro-F1 on 9,390 held-out test articles.
- Engineered a BM25 retrieval engine over a 62K+ article corpus, using n-gram overlap verification to detect whether a submitted article exists in the corpus and return its most similar articles as evidence.
- Implemented a live web fallback using Google News RSS and BeautifulSoup-based URL extraction to retrieve external coverage for articles not in the corpus; built the end-to-end system as an interactive Flask web application.

Influencer Marketing & Sponsorship Analytics Platform [2023 - 2026]
Technologies: FastAPI, PostgreSQL, SQLAlchemy, Apache Kafka, Apache Spark, Microsoft Fabric, Redis, Docker, Power BI

- Developed a role-based FastAPI and PostgreSQL platform for sponsors, influencers, and admins, supporting campaign management, collaboration requests, negotiation, and analytics.
- Processed 100K+ synthetic raw records using PySpark in Microsoft Fabric, building Silver transformations and Gold star-schema tables; orchestrated notebook execution with failure handling.
- Published ad-request events through Apache Kafka and tested Spark Structured Streaming for event validation and deduplication.
- Implemented Redis caching for analytics APIs with a 60-second TTL and invalidation after data updates.
- Configured Docker Compose for Redis and environment-based service integration to support local development.
- Designed a five-page Power BI report using Gold-layer fact/dimension tables, DAX KPIs, and interactive sponsor, influencer, campaign, and financial filters.

Setu — French-to-Hindi Semantic Translation Pipeline [2026 - Present]
Technologies: Python, FastAPI, NLLB (Hugging Face Transformers), SQL

- Built a French-to-Hindi translation pipeline combining a local NLLB neural MT model with an opt-in CSV lookup stage, triggered when text is explicitly marked (italicized and quoted) in the input, to return verified translations for idioms and proverbs.
- Curated ~2,960 French idiom/proverb-Hindi pairs for exact-match lookup; 100 manually verified so far for translation and sentiment accuracy.
- Implemented a custom rule-based sentiment scorer using a bilingual French-Hindi lexicon with negation handling, blending sentence-level and idiom-level scores for paragraph analysis.

EDUCATION

M.Sc. Data Science — VIT AP University [2025-Present]
CGPA: 9.58

B.Sc. Physics (Hons.) — ARSD College, Delhi University [2022-2025]
CGPA: 6.78

Class 12 — CBSE — Army Public School, Birpur [2020-2021]
Percentage: 88.4%

Class 10 — CBSE — Army Public School, Shankar Vihar [2018-2019]
Percentage: 95.33%

CERTIFICATION

IIT Madras — Data Science and Applications
Centre for Outreach and Digital Education, IIT Madras
Completed Foundational Level (CGPA: 8.75), Dec 2023. Relevant Coursework: Python Programming, Database Management Systems, Statistics, Mathematics, Machine Learning Foundations, Modern Application Development.

EXTRACURRICULAR ACTIVITIES

Football | Fitness | Coding | Numismatics
